Yousef Mohamed

Phone: +20-115-868-9513 **Gmail**: yousefgus111@gmail.com **Location**: Cairo, Egypt
GitHub: github.com/Yusfgus **LinkedIn**: linkedin.com/in/yousef-mohamed-a353ba1b2

Education

Ain Shams University October 2021 – July 2025

Bachelor of Science in Computer Science (GPA: 3.383/4.0)

- **Relevant Coursework:** Data Structures (C++), Algorithms (C#), Operating Systems (C), Database Design, OOP (Java), Compiler, Computer Networks, Software Engineering, Neural Networks (Python)

Courses & Certifications:

- Mastering ASP.NET Core: Concepts to Production-Ready APIs (Eng. Issam Abdelnabi)

Projects

JobLink | *Job Portal Backend API | ASP.NET Core, Clean Architecture, CQRS, MediatR*

- Built a job portal REST API with ASP.NET Core covering jobs, applications, and user management
- Implemented JWT authentication with refresh tokens and resource-based authorization
- Applied CQRS with MediatR to separate read/write operations and improve maintainability
- Used EF Core for commands and Dapper for optimized queries
- Designed a normalized SQL Server schema with indexed relationships
- Standardized API responses using a Result-based error handling pattern
- **GitHub**: github.com/Yusfgus/JobLink-API

Arabic Lip-Reading System | *Graduation Project | Python, OpenCV, Streamlit*

- Collaborated in designing and training a deep learning pipeline for Arabic lip-reading
- Achieved **89.92% accuracy** on a custom dataset of **500+ video samples**
- Preprocessed and labeled video data using OpenCV, standardizing frames to improve model performance
- Developed a Streamlit web app for real-time video input and Arabic text prediction in under 5 seconds
- Applied deep learning techniques for sequence-based classification and temporal feature learning in video data
- **GitHub**: github.com/youssefx991/Arabic-Lip-Reading-Streamlite-App

Card Game | *Browser Multiplayer Game | HTML, CSS, JavaScript, Firebase*

- Built a 2D multiplayer browser-based card game inspired by the Egyptian game "سكرو"
- Implemented real-time multiplayer functionality using Firebase for synchronization and game state management
- Developed interactive UI using HTML, CSS, and vanilla JavaScript
- **Live Demo**: yusfgus.github.io/SkreWeb/

Technical Skills

Languages: C#, JavaScript, TypeScript, Java, Python, C++, SQL
Frameworks & Libraries: ASP.NET Core, Entity Framework Core, Dapper, Angular, MediatR, Fluent Validation, LINQ
Tools: Docker, Git, GitHub, Visual Studio, VS Code, SQL Server, Swagger, Postman, .NET CLI, Angular CLI
Concepts: REST APIs, Clean Architecture, CQRS, Repository Pattern, Caching strategies, SOLID, OOP, JWT Authentication

Additional Information

Military Status: Exempted **Languages:** Arabic – Native, English – B1
